Manufacturing in U.S.A.

² Headquarters

Located a few miles from the border in San Diego, we Operate an automated SMT and thru-hole assembly Facility. The combination of state of the art equipment, Technical expertise, a well trained work force, and the Ability to downstream labor intensive operations to our Assembly facility across the border, allow us to have the Quality, flexibility and cost efficiencies to manufacture the Most sophisticated products, all with strict adherence to Our customer's quality, delivery and cost requirements.

² *Entiv an IBS Electronics Group Company*

Manufacturing in Mexico.

³We are one of a handful of companies in the world That offer “in-house” bare board fabrication. With a facility in Tijuana, we offer PCB Fabrication at off-shore prices with domestic delivery and quality. We also perform labor-intensive electronics Assembly, such as thru-hole PCB assembly, surface mount, and cable assembly.

Manufacturing in Asia.

⁴We provide customers access to offshore manufacturing
Through our network of Asian partners. Both
Assembly and Bare Board fabrication.
Leadtime: 6 to 8 weeks
All of our customer service, sales and engineering
Issues are handled through our Santa Ana office.
